Stat-Ease Hosting Online DOE Summit

MINNEAPOLIS – April 12, 2020 – [Stat-Ease, Inc.](#), a leader in the field of design of experiments (DOE), today announced the dates for its 2020 Online DOE Summit. This free series of educational webinars is taking the place of the postponed 8th European DOE Meeting.

The Summit brings together experts in the field of statistics and users of Design-Expert[®] software, a program providing the powerful tools of DOE for industrial experimenters. Topics center around new developments and best practices in DOE, with the presentations and case studies geared toward the topic of ‘Make the most from every experiment’.

“We leveraged our pandemic-postponed European conference in Europe to line up this Online Summit,” says Mark Anderson, Principal at Stat-Ease, Inc. “These informative talks can now be shared with all of our followers worldwide. They free and open to everyone. It’s the classic lemonade from lemons turnaround to create a win for all concerned.”

Details about the 2020 Online DOE Summit can be found on Stat-Ease's website at

About Stat-Ease

Based in Minneapolis, [Stat-Ease](#) was founded in 1982 and has become a leading provider of design of experiments (DOE) software, books, training, and consulting services. Using these statistical methods, scientists, engineers, statisticians, quality experts, and research and development teams can improve the quality of products, enhance processes, quickly solve manufacturing problems, and make breakthrough discoveries. Via multifactor testing techniques, DOE quickly leads users to the elusive sweet spot where all requirements are met at minimal cost.
