STAT-EASE LAUNCHES DESIGN-EXPERT® VERSION 11 SOFTWARE FOR MAC OPERATING SYSTEMS

New macOS Version Enables an Intuitive Interface to Build and Analyze Experiment Designs

MINNEAPOLIS – October XX, 2018 – Stat-Ease, Inc., a leader in the field of design of experiments (DOE), today announced the release of Design-Expert® software, version 11 (DX11) for Apple Inc.’s macOS. DX11 benefits engineers, scientists, statisticians, research and development teams, quality experts, and other researchers who wish to efficiently improve processes, innovation and design.

“As the use of Mac computers continues to grow in both enterprise and academic settings, we saw a need to create a macOS version of DX11,” said Pat Whitcomb, Founder of Stat-Ease. “Our software is ideal for the non-statistician who needs to run DOE’s. The intuitive interface provides easy navigation to build and analyze experiment designs. In addition, this is the only DOE software package that determines cause and effect relationships with maximum efficiency.”

Stat-Ease gives Mac users what they have asked for: Potent DOE software that runs in the macOS. No need to run an emulator. With a clean, fresh and modern interface, DX11 is more configurable, offering multiple windows to view and arrange at the click of a button. The
new multigraph feature provides side-by-side and up-down views of diagnostic plots for easy comparison. DX11 also includes upgraded toolboxes, enhanced graphics, new design capabilities, and improved analysis.

“Stat-Ease keeps design of experiments practices simple and effective to use and interpret,” said Richard Williams, Six Sigma MBB and Consultant at Richard Scott Williams, LLC.

“Design-Expert version 11 goes one step further with simplicity and practicality. The new platform and layout makes the most relevant information appear at just the right time in the analysis, through the use of the Notebook option. Version 11 sets the stage for future enhancements, while maintaining continuity with prior versions.”

The new Mac version and the version for Windows systems is available now for $1,350.00 (single-user license), which includes 12 free months of annual support and maintenance. Annual network licenses are also available. For a complete list of DX11’s features, visit: https://www.statease.com/dx11.html#description. Details about Stat-Ease software, training or consulting services are available at www.statease.com, or by phone: 612-378-9449, or e-mail: info@statease.com.

About Stat-Ease
Based in Minneapolis, Stat-Ease was founded in 1982 and has become a leading provider of design of experiments (DOE) software, books, training, and consulting services. Using these statistical methods, scientists, engineers, statisticians, quality experts, and research and development teams can improve the quality of products, enhance processes, quickly solve manufacturing problems, and make breakthrough discoveries. Via multifactor testing techniques, DOE quickly leads users to the elusive sweet spot where all requirements are met at minimal cost.
